

GOWTHAM VELUSAMY

Junior QA Engineer | QA Test Engineer

Phone: +91 7904517141 | Email: gowthamkv1720@gmail.com | LinkedIn: [linkedin.com/in/gowtham-kv](https://www.linkedin.com/in/gowtham-kv) | Location: Karur, Tamil Nadu, India

PROFESSIONAL SUMMARY

Results-driven **QA Test Engineer** with **3.1 years of experience** specializing in Manual Testing, Software Testing Life Cycle (STLC), API Testing, and Quality Assurance for Machine Learning (ML)-driven platforms. Demonstrated expertise in Test Case design and execution, Requirement Traceability Matrix (RTM) preparation, and end-to-end Defect Lifecycle Management in JIRA. Proficient in web automation using **Python, Selenium WebDriver, Pytest, and Robot Framework**, backend database validation using **SQL**, and API testing with **Postman**. Proven track record of cross-functional collaboration with developers, ML engineers, and business analysts to deliver high-quality AI document processing systems and web applications.

TECHNICAL SKILLS

Testing Types & Methodologies: Manual Testing, Functional Testing, Regression Testing, Smoke & Sanity Testing, Integration Testing, User Acceptance Testing (UAT), REST API Testing, End-to-End (E2E) Testing, Load & Stress Testing, Performance Testing, Security Testing, Data Validation, Cross-Browser Testing, Negative Testing, Content Validation.

Automation & Programming: Python, Java, Selenium WebDriver, Robot Framework, Postman (API Testing), Pytest, Pandas, HTML, CSS.

Tools & Infrastructure: JIRA (Defect Tracking), SQL, Git, GitHub Actions, CI/CD Pipelines, BrowserStack, Chrome DevTools, Appium, TestRail, BDD Cucumber, MS Excel, Figma, WordPress.

AI/ML & Domain Knowledge: Machine Learning, Deep Learning, ML Pipeline Validation, Model Output QA, AI Document Processing QA, On-Page SEO Validation.

PROFESSIONAL EXPERIENCE

Junior QA Tester / QA Engineer | *Objectways Technologies — Tamil Nadu, India* **July 2023 – Present**

- Oversaw end-to-end Software Testing Life Cycle (STLC) for internal annotation platforms and ML data pipelines, ensuring 100% test coverage and on-time sprint delivery across all release cycles.
- Analyzed Business Requirement Documents (BRD), prepared Test Plans, Test Scenarios, and Requirement Traceability Matrix (RTM). Executed Functional, Regression, Smoke, Sanity, Integration, E2E, Performance, and UAT testing across all platform modules.
- Managed complete Defect Lifecycle in JIRA — logged detailed bug reports with reproducible steps, severity, and priority; authored comprehensive Test Summary Reports for stakeholders after each sprint cycle.
- Led and mentored QA team members — handled task allocation, daily stand-up coordination, test execution planning, team performance tracking, and milestone delivery.
- Validated REST API responses and payloads via Postman; collaborated cross-functionally with software developers, ML engineers, and Business Analysts to maintain strict quality standards across all release builds.
- Designed and implemented a test automation framework using **Python and Selenium WebDriver** to automate high-frequency regression test scenarios, scheduling daily execution triggers for repetitive UI workflows.

KEY PROJECTS

1. Blueprint Validation (AI/ML Intelligent Document Processing Platform)

Intelligent document processing platform that auto-extracts key-value pairs from uploaded documents and populates target web application fields via an ML engine (Blueprint Creation & Blueprint Response modules).

- Analyzed BRD, prepared RTM and Test Plans; executed Smoke, Sanity, Functional, Integration, Regression, and E2E Testing manually; performed manual Data Validation to verify key-value extraction accuracy across all document types.
- Conducted manual API Testing via Postman and used SQL queries to validate backend database integrity; coordinated UAT, prepared Test Summary Reports, and managed QA team members (task allocation, stand-ups, milestone tracking), collaborating with ML engineers and developers for defect root cause resolution.

2. PMT – Employee Performance & Resource Tracking Portal

High-traffic internal web application tracking employee active/idle/offline status, working hours, and generating billing reports for payroll and invoicing across the organization.

- Performed manual Functional Testing across all portal modules; manually validated billing records and data flows against the backend database via SQL; conducted manual API Testing on all service endpoints via Postman to verify request and response accuracy.
- Performed manual Stress and Load Testing under concurrent multi-user access scenarios; manually validated billable vs. non-billable hour accuracy across payroll cycles; managed all defects in JIRA through closure each cycle.

3. Website Testing & Data Explorer QA (Objectways Platform)

Full-cycle manual QA, SEO audit, and test automation for corporate WordPress website and high-traffic data explorer modules.

- Executed end-to-end manual QA on a WordPress website, validating responsive UI, layout consistency, and cross-browser functionality across desktop, tablet, and mobile devices.
- Conducted pixel-perfect design comparisons against Figma wireframes and audited on-page SEO elements (meta tags, image alt text, redirects).
- Built a **Python-Selenium** automation script to automate daily functional testing for the "Contact Us" lead-capture form with a scheduled daily trigger.
- Tested REST API payloads using Postman, verified backend data integrity via SQL, executed load testing on high-traffic data explorer pages (verifying zero buffering under large file uploads), and managed defect lifecycles in JIRA.

4. Liceum.ai — AI-Powered Freelance Marketplace Platform

An Upwork-style platform where Recruiters post jobs and skill-matched Workers apply, supporting Fixed-Price Milestone-based projects and Hourly billing cycle payments.

- Prepared Test Plans, Test Cases, and RTM across all platform modules; manually executed Functional and Integration Testing covering field-level validations, mandatory field enforcement, milestone status transitions (Pending → Submitted → Approved/Rejected), and verified approved milestone funds are correctly credited to the Worker's account.
- Performed manual Negative Testing for unauthorized fund release, empty milestone submissions, and unauthorized contract access; manually validated payment transactions, milestone fund allocations, and billing amounts against UI and invoice values; managed all defects in JIRA through closure.

AWARDS & RECOGNITION

- **Annual High-Achiever Award (2024):** Recognized as the top-performing Analyst for innovation and sustained project impact across the organization.

- **Monthly Performance Excellence Award (Nov 2023):** Awarded for outstanding contribution to the Blueprint Creation (BPC) module quality and timely delivery.

EDUCATION

Data Analytics <i>SLA Institution — Chennai, Tamil Nadu</i>	2022 – 2023
Grade: A	
M.Sc. Physics <i>Karpagam Academy of Higher Education — Coimbatore, Tamil Nadu</i>	2020 – 2022
CGPA: 8.2
